

# Multi-light™ CXP-461 IC

The lightest plate available

ADVANCED ARMOUR

CXP-461 IC	
<b>Dimensions &amp; weight</b>	250 x 300 mm 720 gr
<b>Configuration</b>	NIJ 0101.06 Level III + AK47MSC ICW III A vest
<b>Type of protective cover</b>	Black textile
<b>Product application</b>	Tactical Body Armour

## AN ADAPTABLE BODY ARMOUR SYSTEM

TenCate Advanced Armour presents the new TenCate Multi-light™ CXP-461 IC Basic Light plate and the additional Operator and Breacher plates. The TenCate Multi-light™ CXP-461 IC Basic Light is an ultra-light plate providing protection against NIJ level III+AK47MSC in accordance with NIJ 0101.06 at only 720 gr and can accommodate the Operator or Breacher plate to increase the protection level to 5.56x45 SS109 or AP ammunition up to NIJ level IV respectively.

The TenCate Multi-light™ CXP-461 IC Basic Light plate is by itself up to 25% lighter than currently marketed AK47MSC plates and reflects TenCate Advanced Armour's commitment to decrease individual operator load while providing essential protection. The complementary plates offered in the system leverages the protective capability of the Basic Light plate to reach a protection level against higher classified threats. This provides the individual operator the possibility to tailor ballistic protection level on a mission-by-mission requirement, equips the individual operator for a broader range of operations, and decreases the need for units to inventory plates for specific operational requirements.

	+		=	<b>Protection against</b> > 7.62 x 51 M80 > 7.62 x 39 AK47 MSC		
Soft		Basic light				
	+		+		=	<b>Protection against</b> > 7.62 x 51 M80 > 7.62 x 39 AK47 MSC > SS109
